

ERP Software for Center-of-Plate Protein Processors and Distributors

Benefits

Optimize Production, Cutting and Staging

Improve processing efficiency and get more accurate production yields. Reduce costs, simplify lot tracking, and calculate exact costs for finished goods. Eliminate manually entered shipped weights for every order.

Improve Warehouse & Freezer Visibility

View inventory at multiple company divisions, public cold storage facilities and 'on the water' so you always know what's available for sale. Reduce inventory costs, provide tighter control of stock levels, improve receiving, staging, picking and replenishment time and minimize errors.

Simplify Sales Order Management

Let customers place orders online 24/7. Simplify order entry, ship goods right the first time and get paid faster. View pricing and costs, committed and on-order inventory, and detailed customer information – all on a single screen.

Increase Packing Efficiency

Capture packing weights from scales for more accurate production yields. Automatically tag produced lots to the customer's order. Print bar-coded labels with full product descriptions and weights. Deliver orders faster and with more accuracy.

Industries

Food & Beverage
Protein and Specialty Foods

Features

Production

Production-ready, wash-down workstations, electronic scales, bar code scanners and label printers provide more efficient and production processing and more accurate yields.

Sales

Increase sales and profitability with remote order entry and convenient payment processing. Operate retail points of sale with a cash drawer interface and easily track quotes, deposits, and credit issues.

Inventory

Track material from receipt through production to finished goods. View inventory by lot with date received, monitor aging and ensure appropriate stock rotation. Reduce inventory costs and provide tighter control of stock levels and ensure you always have enough product on-hand to fill orders.

Accounting

Manage multiple, separate companies with independent or consolidated financials. Manage receivables to maximize cash flow and net profit. Track sales, payments, record customer communications and prompt credit managers for follow-up to help you get paid on time.
