Benefits

Flexible and Configurable

With more than 1,400 feature combinations, ShopVue addresses the unique needs of your business. It provides out-of-the-box interfaces to leading ERP, PLM, payroll and other third-party systems.

Quick Time to Value

Implementation is typically completed in 8-12 weeks and customers achieve a positive ROI in 6-12 months.

Low Touch, High Efficiency

Built with the end user in mind. Operators and Supervisors love to use ShopVue. ShopVue delivers minimal manual entry while providing maximum insights.

Secure and Reliable

Role-based permissions ensure secure access profiles. Ask about our reference accounts to hear from ShopVue customers like you.

Features

Shop Activity & Labor
Track labor and WIP status on-demand. Update your ERP continuously, improving its planning and tracking functions.

Time & Attendance
Balance Attendance and Labor records in one system to understand and measure employee activities.

Paperless Factory
Digitally communicate this shift's work list to operators, eliminating paper packets with online drawings and order information.

Direct Machine Interface
Capture key performance data like status, yield, and quantity automatically through your machine PLCs.

Traceability
Minimize recall exposure with forward / backward trace and comprehensive "as built" information.

Digital Instructions
Provided step by step instructions with pictures and videos. Collect test data to validate quality and process.

Manufacturing Analytics
Visualize KPIs like OTD, OLE, OEE, and WIP as it happens to leverage key insights for continuous improvement.

Smart Factory APIs
Leverage APIs for a seamless communication infrastructure, linking critical touch points for a real-time view of manufacturing operations.
